

ANCESTRY

This section contains a modified code list for ancestry categories for the PUMS. Some categories have been grouped. Each person enumerated in the census had the opportunity to enter two distinct ancestry identities which indicated his or her ethnic origin.

Each entry received one of the unique three-digit codes listed below.

All codes are listed below. However, not all ancestry entries are listed. The ancestry codes can be aggregated to create commonly recognized national groupings. For example, the code for Walloon has been collapsed with other "Belgian" entries to form a national grouping representative of an area in Europe. National groupings can also be collapsed to represent continental areas. For example, Belgium can be added to France and other European clusters to form a representation of that continent. "n.e.c." is the abbreviation for not elsewhere classified.
